

NICE to Showcase New Digital Policing Solution, NICE Investigate, at IACP Conference

Former Boston Police Commissioner Ed Davis joins NICE to share his perspectives on digital policing

Paramus, New Jersey – October 21, 2015 – NICE Systems (NASDAQ: NICE) will showcase its portfolio of digital policing solutions, featuring the newly launched [NICE Investigate](#), in booth 1250 at the International Association of Chiefs of Police ([IACP Annual Conference and Exposition](#)) being held October 24-27 at McCormick Place West in Chicago.

Visitors will see first-hand how NICE Investigate tackles a critical information management challenge facing police departments: the siloed nature of digital evidence. By streamlining the collection and organization of potential evidence, the NICE solution improves the efficiency and effectiveness of the investigation process, and helps investigators make sense of disparate data to understand the who, what, where, when, and why of their cases. Secure data sharing capabilities help police and prosecutors close more cases faster and increase successful prosecutions.

NICE Investigate is the leading market solution that addresses the entire digital investigation process, going well beyond the siloed digital evidence management solutions in use today. The solution's integration capabilities allow police to correlate evidence from a variety of applications and sources, including CAD, RMS systems, body camera video, and more. It also provides: automated workflows to expedite case building; content analytics and visualization so investigators can draw connections among digital content from various sources; and secure sharing functionality to facilitate collaboration within and across agencies while maintaining chain of custody and integrity of evidence.

NICE will be joined at the IACP Annual Conference and Exposition by a special booth guest, former Boston Police Commissioner Ed Davis, who will share his perspectives on digital policing. Mr. Davis will also join Lt. Col. (Ret.) Frank Matthews (former Division Commander, Massachusetts State Police, Division of Investigative Services), Bill Taylor (Superintendent, Lowell Police Department), and Rod Guy (VP Strategy & Business Development, NICE) in a panel discussion on "Digital Policing: The New Weapon for 21st Century Law Enforcement," which will take place October 26, at 1-3 p.m. in room W179B.
